

# Plant for Pollinators

## 2023 ANNUAL REPORT

The Cincinnati Zoo & Botanical Garden was awarded several grants to increase pollinator habitat in the community.

**NEARLY 3,400**

Gardens planted since 2019

North America hosts nearly **3,600** species of native bees.

**17**

Bee Our Partners in 2023!

**116** pollinator kits sold in 2023!

Became the world's only arboretum within a Zoo to achieve Level IV accreditation through ArbNet—a program with the only global initiative which officially recognizes arboreta.

Gardens registered in **37 STATES AND TWO COUNTRIES**

17 Pollinator Watch Volunteers (Citizen Scientists) logged over 300 hours and collected 5,300 data points observing pollinators.

**OVER 7,600**

reached through pollinator-focused horticulture talks in 2023

**TAKE THE NEXT STEP!**

Upload pollinator data that you find by going to <https://www.inaturalist.org/> and setting up an account.

**6,970**

visitors at the Monarch Festival event at the Zoo in 2023

Over **85%** of the world's flowering plants rely on pollinators.

*"A garden is like a river. It flows, it's always moving, and it's never the same. It never reaches anywhere other than in this moment."*

—Monty Don

*"I registered my gardens a few years back and proudly display my sign."*

—Margie S., P4P Facebook Page
