

Pre-K & K: Ani-Math

Become a math master with a little help from the Zoo animals.

Description: We can count and group animals that we see at the Zoo to help us practice our math skills.

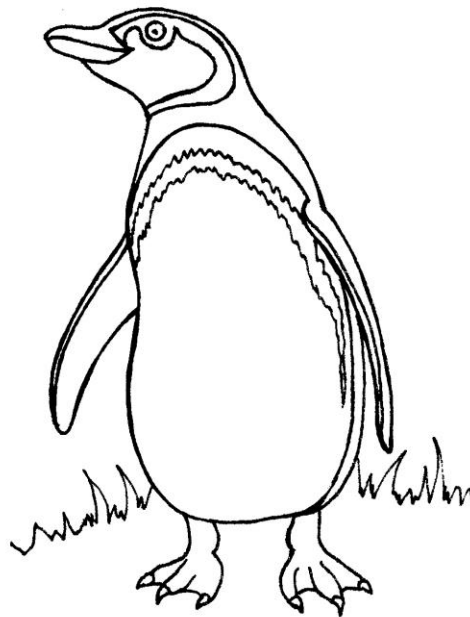

Location at Zoo: Elephant Trek, Swan Lake, African Penguin Point **Materials:** Pencil, crayons, clipboard

Activity: Head to the Elephant Trek habitat and answer the following questions

1. How many elephants can you count in the Elephant Trek habitat? _____
2. Together, all the elephants have _____ legs and _____ trunks.

Activity: Head to the African Penguin Point habitat and answer the following questions

3. How many penguins can you count in the habitat? _____
4. How many penguins are swimming in their pool? _____
5. What colors do you see on the penguins? Use your crayons to color the penguin below to match what you see:

Activity: Head to Swan Lake and answer the following questions

6. There are many kinds of birds swimming in Swan Lake. Count the number of birds you see that match the pictures below then write that number next to each picture.

Type of bird	Number counted
 Mallard duck	
 Red-crowned crane	
 Trumpeter swan	
 Wood duck
